TECHNICAL SKILLS

|                |                                                                                |
|----------------|--------------------------------------------------------------------------------|
| Languages      | Python (Advanced), JavaScript (Intermediate), C/C++ (Intermediate), SQL        |
| Frameworks     | TensorFlow, PyTorch, React, Node.js, Express, Pandas, Matplotlib, Hugging Face |
| AI/ML          | Deep Learning, Transformers, RAG, Computer Vision, NLP, Medical Image Analysis |
| Cloud & DevOps | Azure (Certified), AWS, Git, Docker, CI/CD Pipelines                           |
| Databases      | MongoDB, MySQL, PostgreSQL, Vector Databases (FAISS)                           |
| Tools          | Jupyter, MediaPipe, VSCode, FFmpeg, LaTeX, Agora, Salesforce API               |

EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                      |

## PROJECTS

---

- 🔊 Automated Shorts Generator (Jan 2025)
  - **Tools:** Python, Azure Speech Service, MediaPipe, FFmpeg
  - Constructed end-to-end pipeline processing 3+ hours of podcast content into 20+ social media shorts in under 15 minutes
  - Formulated facial detection algorithm maintaining subject framing with 93% accuracy during aspect ratio conversion
  - Decreased manual editing requirements by 85%, saving approximately 40 hours of post-production time per project
  - Developed semantic highlight extraction system with 76% accuracy in identifying engaging content segments
- 🔊 Sales Assistant With Live Call Suggestions (Aug 2024)
  - **Tools:** React, Gemini API, Mongoose, Agora, Azure
  - Launched AI-driven system analyzing 2,000+ customer interactions to provide real-time conversation guidance
  - Programmed prediction models offering context-aware suggestions with 82% relevance rating from sales teams
  - Cut new sales representative training time by 40% through AI-assisted coaching across 15 client organizations
  - Produced visualization dashboard processing 50+ metrics for evaluation of 100+ daily customer interactions
- 🔊 Harmful Brain Activity Classification (Nov 2024)
  - **Tools:** TensorFlow, EfficientNet, Wavelet Transforms, ICA
  - Designed ensemble model analyzing 15,000+ EEG segments to identify 5 distinct seizure categories with 92% accuracy
  - Applied ICA preprocessing reducing signal noise by 65% and improving feature extraction quality
  - Created novel spectral pattern detection algorithm processing 128-channel EEG data in under 3 seconds per sample
  - Collaborated with 2 neurologists to validate model results against 300+ clinically confirmed cases

## CERTIFICATIONS

---

- Microsoft Certified: Azure AI Engineer Associate (AI-102) — Certificate ID: MS-12345 — Feb 2025
- Stanford University & DeepLearning.AI Machine Learning Specialization — March 2024
- Stanford University & DeepLearning.AI Deep Learning Specialization — January 2024
- OracleCloud Generative AI Certified Professional — November 2023

## ACHIEVEMENTS

---

- GATE DA 2025: Secured All India Rank 915 (top 3%) & GATE CS: All India Rank 5335 (top 8%)
- Awarded consecutive Gold Medals for academic excellence in first and second year of B.Tech (top 1%)
- Ranked 10th among 300+ teams in IndoML National Level Datathon (top 3.3%)
- Led 4-person team to 1st Place victory in Hactopia Hackathon at PCCOE against 50+ competing teams
- Secured 2nd Place among 75 teams in PICT Dataquest Datathon, recognized for novel approach to data analysis
- Received Special Recognition with 4th Place in Cavista Hackathon for innovative healthcare solution
- Placed 40th among 4,500+ participants (top 1%) in the Vultr Cloud National hackathon
