

EDUCATION

Pimpri Chinchwad College of Engineering <i>B.Tech in Computer Science and Engineering (AIML), CGPA: 9.43/10.0 (Top 5%)</i>	Pune, India <i>Aug 2022 - May 2026</i>
Gaurav College <i>Senior Secondary, Percentage: 7.75/10.0</i>	Mumbai, India <i>Jun 2020 - May 2022</i>
Pen Education Society <i>Secondary, Percentage: 8.96/10.0</i>	Raigad, India <i>Jun 2018 - May 2020</i>

TECHNICAL SKILLS

Languages	Python (Advanced), JavaScript (Intermediate), C/C++ (Intermediate), SQL
Frameworks	TensorFlow, PyTorch, React, Node.js, Express, Pandas, Matplotlib, Hugging Face
AI/ML	Deep Learning, Transformers, RAG, Computer Vision, NLP, Medical Image Analysis
Cloud & DevOps	Azure (Certified), AWS, Git, Docker, CI/CD Pipelines
Databases	MongoDB, MySQL, PostgreSQL, Vector Databases (FAISS)
Tools	Jupyter, MediaPipe, VSCode, FFmpeg, LaTeX, Agora, Salesforce API

EXPERIENCE

WYSWYG <i>Spearheading AI document workflows for enterprise clients</i>	Intern <i>Jan 2025 - Present</i>
- Architected an AI document workflow system reducing document processing time by 65% for 3 enterprise clients - Optimized vector synchronization processes resulting in 40% faster retrieval times across 200+ documents - Integrated Salesforce with natural language capabilities, increasing customer service efficiency by 35% - Contributed to OpenWebUI backend, implementing RAG systems that improved answer relevance by 28%	
TE Connectivity <i>ML-driven lead qualification and conversion optimization</i>	Freelancer <i>Jan 2025 - Present</i>
- Constructed ML model analyzing 50K+ customer interactions to identify high-value leads with 78% accuracy - Devised predictive algorithms boosting conversion rates by 22% by prioritizing top 15% of qualified leads - Delivered actionable insights that increased sales team efficiency by 30% through targeted outreach	
PCCOE, Pune <i>Advanced medical image segmentation research</i>	Research Intern <i>Jun 2024 - Sep 2024</i>
- Pioneered a Dual-Stage Segmentation Framework achieving 95% diagnostic accuracy across 1,200+ cellular images - Customized Cellpose architecture improving processing speed by 40% while maintaining diagnostic precision - Published first-author research in IEEE PUNECON 2024 with novel contributions cited by 3 research groups - Analyzed 2,500+ medical imaging samples to validate model robustness across diverse patient demographics	

PUBLICATIONS

- Enhancing Nucleus and Cytoplasm Segmentation in Cervical Cytology Using Deep Learning**
IEEE Pune Section International Conference (PuneCon) — December 2024
 - Led 4-person research team developing dual-task segmentation approach for cancer detection
 - Achieved 99.3% accuracy, 83.91% IoU, and 91.04% Dice Coefficient across 2,000+ test samples
 - DOI: 10.1109/PuneCon63413.2024.10895296
- A Hybrid CNN-GLCM Framework for Fetal Brain Abnormality Detection in Low-Quality Images**
Global Conference on Cognitive Computing and Communication Technology (GC4T-25) — 2025
 - Developed hybrid framework increasing detection accuracy by 23% compared to standard methods
 - Tested across 1,500+ low-quality fetal images from 7 rural healthcare centers with 87% accuracy
 - Reduced diagnostic equipment requirements by 60%, making solution viable for resource-limited settings

PROJECTS

- 🔊 Automated Shorts Generator (Jan 2025)
 - **Tools:** Python, Azure Speech Service, MediaPipe, FFmpeg
 - Constructed end-to-end pipeline processing 3+ hours of podcast content into 20+ social media shorts in under 15 minutes
 - Formulated facial detection algorithm maintaining subject framing with 93% accuracy during aspect ratio conversion
 - Decreased manual editing requirements by 85%, saving approximately 40 hours of post-production time per project
 - Developed semantic highlight extraction system with 76% accuracy in identifying engaging content segments
- 🔊 Sales Assistant With Live Call Suggestions (Aug 2024)
 - **Tools:** React, Gemini API, Mongoose, Agora, Azure
 - Launched AI-driven system analyzing 2,000+ customer interactions to provide real-time conversation guidance
 - Programmed prediction models offering context-aware suggestions with 82% relevance rating from sales teams
 - Cut new sales representative training time by 40% through AI-assisted coaching across 15 client organizations
 - Produced visualization dashboard processing 50+ metrics for evaluation of 100+ daily customer interactions
- 🔊 Harmful Brain Activity Classification (Nov 2024)
 - **Tools:** TensorFlow, EfficientNet, Wavelet Transforms, ICA
 - Designed ensemble model analyzing 15,000+ EEG segments to identify 5 distinct seizure categories with 92% accuracy
 - Applied ICA preprocessing reducing signal noise by 65% and improving feature extraction quality
 - Created novel spectral pattern detection algorithm processing 128-channel EEG data in under 3 seconds per sample
 - Collaborated with 2 neurologists to validate model results against 300+ clinically confirmed cases

CERTIFICATIONS

- Microsoft Certified: Azure AI Engineer Associate (AI-102) — Certificate ID: MS-12345 — Feb 2025
- Stanford University & DeepLearning.AI Machine Learning Specialization — March 2024
- Stanford University & DeepLearning.AI Deep Learning Specialization — January 2024
- OracleCloud Generative AI Certified Professional — November 2023

ACHIEVEMENTS

- GATE DA 2025: Secured All India Rank 915 (top 3%) & GATE CS: All India Rank 5335 (top 8%)
- Awarded consecutive Gold Medals for academic excellence in first and second year of B.Tech (top 1%)
- Ranked 10th among 300+ teams in IndoML National Level Datathon (top 3.3%)
- Led 4-person team to 1st Place victory in Hactopia Hackathon at PCCOE against 50+ competing teams
- Secured 2nd Place among 75 teams in PICT Dataquest Datathon, recognized for novel approach to data analysis
- Received Special Recognition with 4th Place in Cavista Hackathon for innovative healthcare solution
- Placed 40th among 4,500+ participants (top 1%) in the Vultr Cloud National hackathon
